

Congratulations David Overman - PRA Chapter 30

This is the latest e-mail from our local CFI. (Chapter 30 operates out of Auburn Airport in the Greater Peugeot Sound Area of Washington, USA.)

Hello Everyone,

Yesterday I passed my Helicopter CFI check ride which also renewed my Gyroplane CFI Certificate. I am now an official Helicopter and Gyroplane Flight Instructor.

The Gyroplane in Auburn is still waiting for an Altimeter / Transponder check, but will be legal to fly shortly. I am still working the Graveyard shift with Tuesdays, Wednesdays, and Thursday mornings to instruct. On January 4th I will have Mondays and Tuesdays available all day for flight instruction. There are still good flying weather days throughout the winter, the air is crisp and the lift and visibility is great (like today).

Email is the best way to contact me as I may be sleeping during the day. If you do call me and I don't answer, leave a message and I will call you back when I wake up.

Have a great day!

Regards,

David Overman
